

WHITE PAPER

SPIDER COIN INTERFACE

SPIDER COIN DEPLOY SOLIDITY ON SMART CONTRACT

<https://github.com/spidercoininterface/SID-INTIGRATE>

Abstract

In the past decade, Artificial Intelligence (AI) has achieved remarkable results in the areas of task specific intelligence such as: Natural Language Processing, Speech Recognition, and Computer Vision among many others. Right now, we stand at a turning point in the history. of Artificial Intelligence driven by the trends of improved algorithms, exponential growth in computational power, explosion of data, and the development of AI hardware such as GPUs. These technical breakthroughs are paralleled by an unprecedented adoption of AI. technology to solve real world problems. Along with those factors, the AI community has contributed greatly to the rapid development and progress in the AI ecosystem. And we at Spider Coin Interface believe that the community will be increasingly important going forward.

The AI community has come far in its journey, but it is only getting started. Companies all around the globe are adopting AI faster than they have adopted any other technology ever before. Today, each of these companies are spending millions of dollars every month in building and maintaining customized deep learning solution to offer better solutions and

products to their users and customers. And this is ever-increasing. Unless this changes with the adoption of a technology like that of the Spider Coin Interface.

The Spider Coin Interface distributes heavy deep learning training in the ecosystem using blockchain and incentivizes those who contribute their compute resources in exchange for Spider Coin Interface Tokens, by introducing a new protocol backed by a tested deep learning training distribution algorithm.

What is Spider Coin (SID)

It is the world's first and only blockchain-based freelancer platform on the **Binance Chain** network, working with fully decentralized and smart contracts. And it is a decentralized and distributed deep-learning training protocol which provides cost-efficient and faster training of deep neural networks by utilizing the compute resources in the network.

Benefits of Spider Coin (SID)

Decentralizing and distributing the training of deep Neural nets is an evolved form of

localized AI development, much like a lot of other technologies in the past viz., the internet.

With the best interests it will be accelerating the development and the adoption of AI technologies like deep learning. To count a few concrete benefits that Spider Coin Interface will have in the entire ecosystem:

- **Faster Training**
- **Cost Efficiency**
- **Openness**
- **Faster Updating**
- **Standardized flow**
- **Newer Applications**
- **Increased experimentation**
- **8. New AI-proof economy**

Why Spider Coin (SID)

Deep learning is made possible today because of parallel computations. GPUs are all about doing hundreds and thousands of micro calculations at the same time.

We have come really far in terms of speeding up deep neural networks' training. There is still a long way to go from here. Developers are always coming up with creative hacks to utilize what's available at their disposal and do something exceptional with it. With a new parallelization framework, Spider Coin Interface is a complementary attempt to promote and help grow the AI ecosystem.

How Does Spider Coin (SID) do this?

Spider Coin Interface is trying to create a self-sustaining and dynamic ecosystem for Customers who want to train their AI engines regularly to keep them updated, Contributors who would like to support the ecosystem by sharing their compute resources in the form of Computers, Smartphones or even a server rack. And, Contributors as Partners in the form of various website owners who are willing to support the Spider Coin Interface platform by inviting their network of users/viewers.

To help them build this cohesive relationship, Spider Coin Interface (SID) will work as the common ground to facilitate a secure transaction that may take place inside Spider Coin Interface Ecosystem.

To provide a fair ground for the transactions, various costs inside the Spider Coin Interface Ecosystem will be pegged to USD, which will provide transparency to the customers.

Following is tentative structure of the transaction framework between key entities operating in the Spider Coin Interface Ecosystem:

Why Choose BEP20 Technology For Spider Coin (SID)

Because Binance Smart Chain is built on a dual chain architecture (along with Binance Chain), and can be easily connected to other blockchains, it is able to allow fundamentally distinct blockchains to easily exchange information. This capability makes it attractive to platforms that want to support assets from multiple different blockchains.

- **Fast Transactions**

As mentioned earlier, Binance Smart Chain uses a Proof-of-Stake consensus algorithm and is able to achieve a block time of 3 seconds. This is 4 times faster than the Ethereum blockchain which has a block time of 13 seconds.

- **Low Transaction Fees**

Ethereum network congestion and scalability issues have once again triggered skyrocketing gas fees. BEP-20 provides a big relief there as the transaction costs are only a few cents.

- **Cross-chain compatibility**

Binance Chain and Binance Smart Chain are compatible chains. As a result, BEP-20 and BEP-2 tokens can be easily moved across both networks using a simple wallet.

- **Exchange listings**

BEP-20 token standard has become very popular. As a result, most of the leading exchanges easily list the BEP-20 tokens.

100% safe and unruggable

We value the safety of our investors' funds above everything else. That's why we took the steps to ensure Spider Coin (SID) is 100% safe and technically unruggable. The initial liquidity is locked away forever.

Distribution of Total Spider Coin (SID)

The total supply of **Spider Coin** (SID) tokens is 9,881,000 SID. The Research & Teams will be used 4,940,500 SID (5%) in the application and ecosystem research and development teams Main net is reserved for payment systems etc. We allocated 2,964,300 SID (3%) Angel Investor, Share Holder Partners and advisor. 69,167,000 SID (70%) of tokens are reserved for Onsite private sale ICO supporters and Lading. 11,857,200 SID (12%) of tokens are reserved for Team members for upcoming activities and research. 9,881,000 SID (10%) will use on

marketing pr - media, advertise and strategy making etc.

<i>Distribution Field</i>	<i>Coin Distribution</i>	<i>Total SID</i>
<i>ICO supporters and Lading</i>	70%	69167000
<i>Team members</i>	12%	11857200
<i>Marketing</i>	10%	9881000
<i>Angel investors</i>	3%	2964300
<i>Platform development</i>	5%	4940500
<i>Total Coin</i>	100%	98810000

What is Spider Coin (SID) Charity?

Spider Coin Charity is a charity made up of helpful people in the Spider Coin (SID) community and team. A certain portion of the funds collected from Spider Coin (SID)Token sales are will deliver to people or communities in need. As the Spider Coin (SID) team, we are also developing a blockchain-based module for those who want to donate. We aim to grow our aid fund more and make more effective aid with this module.
